

Project-Based Learning

Pre-K

How can we use
light to change the
world around us?

Pre -K has been exploring how light changes the way we see and experience our world. Students have been investigating and experimenting with light. They are exploring

- How can we create shadows?
- What is a reflection? How can we control and make our own shadows and reflections

Visit Pre-K to learn the “recipe” for a shadow and explore our experiments with reflections.
